

SOLUTION BRIEF

GEP INTAKE & ORCHESTRATION

**The Autonomous Enterprise, Delivered Through Total
Agentic Orchestration**

Powered by GEP Quantum Intelligence

Highlights

- True Agentic AI for end-to-end procurement autonomy
- Single intelligent front door for all spend requests across any channel
- Multi-dimensional intelligence built on 25+ years of domain expertise
- Unified Data, Intelligence & Decision Fabric — no new silos
- Low-code extensibility: deploy changes 5x faster than legacy platforms
- Persona-based control towers and action-driven dashboards
- Library of 1000+ out-of-the-box connectors for rapid integration

In today's volatile world, fragmented systems, broken processes, unintelligent tools, and poor user experience are more than just inefficiency — they are an existential risk. Disconnected data, chaotic workflows, and a lack of real-time intelligence hold enterprises back, exposing them to risk and leaving value on the table. The market offers only partial fixes that fail to address the core problem.

GEP Total Agentic Orchestration is a radical new approach, built on GEP Quantum Intelligence — an AI-native, agentic foundation for procurement and supply chain. It acts as the intelligent brain for your entire business: integrating fragmented systems, automating entire decisions, and giving every user a delightfully simple way to get what they need. The result is a truly resilient, agile, and autonomous procurement and supply chain.

Eliminate the Chaos. Unlock Massive Efficiency. Build the Autonomous Enterprise.

GEP is the only provider that masters all three dimensions of modern enterprise orchestration. We deliver a cohesive Data, Intelligence, and Decision Fabric woven from our two greatest assets: the deepest domain expertise in the industry and GEP Quantum Intelligence. This transforms procurement from a siloed cost center into your enterprise's Value Orchestrator — a strategic engine that powers autonomy, agility, and competitive advantage.

GEP Total Agentic Orchestration empowers enterprises to eliminate waste, slash cycle times, and drive strategic value across every procurement and supply chain function. Its agentic AI doesn't just assist, it acts, decides, and continuously improves, ensuring organizations can navigate complex global landscapes with confidence.

What Makes GEP Unique

- 1 Only Solution Dominating All 3 Dimensions**
 From consumer-grade UX and end-to-end S2P to the full supply chain ecosystem — GEP covers ground competitors cannot even reach.
- 2 Multi-Dimensional Intelligence, AI-Native Foundation**
 GEP Quantum Intelligence is trained on procurement and supply chain language, context, and expertise. Generic AI cannot match its precision.
- 3 Deepest Domain Expertise Coded Into the Platform**
 GEP is a procurement and supply chain leader first. Over 25 years of real-world expertise is embedded into every workflow and decision.
- 4 A Unified Data, Intelligence & Decision Fabric**
 We solve fragmentation at its root — not just wrap it. One cohesive data model connects every system, function, and partner with zero new silos.
- 5 Heavy-Duty, End-to-End Scope**
 Proven mastery of complex direct material procurement and global supply chain orchestration at scale where lightweight tools and legacy suites fall short.

Business Values

- Near-100% user adoption & engagement
- Autonomous operations & cost savings
- Enterprise resilience & risk mitigation
- Agility, innovation & competitive advantage
- Connected intelligence across every workflow

Deliver a Consumer-Grade Experience Through Intelligent Intake Management

The first dimension of Total Agentic Orchestration is a single, intelligent front door for all employees. It meets users where they already work — Microsoft Teams, email, and other collaboration tools — delivering a consumer-grade intake experience that drives near-100% adoption and eliminates intake chaos from the very first prompt.

The solution automatically analyzes and routes every incoming request to the correct downstream process: new supplier sourcing, contract negotiation, or PR/PO creation. Smart dynamic forms, real-time status tracking, and AI-recommended buying guidance ensure compliant, accurate data capture while minimizing effort for casual users. Persona-based control panels give each stakeholder exactly the visibility and actions they should take — intuitively, effortlessly, and rapidly.

Connect, Orchestrate, and Take Action Across Your Entire Value Chain

Total Agentic Orchestration features a unified Data, Intelligence, and Decision Fabric that seamlessly integrates existing systems and eliminates fragmentation at its root. GEP Quantum Intelligence supports cross-domain inquiries across spend, suppliers, contracts, sourcing, and risk, delivering comprehensive insights that drive informed, real-time decisions.

The platform enables enterprises to continuously monitor supplier performance, enforce policies and regulatory standards, and orchestrate collaboration between internal stakeholders, suppliers, and third parties. From proactive contract renewal alerts to multi-tier supply chain visibility, the platform continuously senses, decides, and adapts — turning reactive firefighting into strategic advantage.

The Only Solution That Goes 3-D With GEP Quantum Intelligence

While competitors remain trapped in the first two dimensions — offering either a simple user-facing intake tool or a rigid back-end suite — GEP has built the definitive solution to deliver all three. GEP Quantum Intelligence orchestrates seamlessly across all dimensions: from delightful front-line UX to heavy-duty S2P process automation to the full supply chain ecosystem.

TOTAL AGENTIC ORCHESTRATION IN THREE DIMENSIONS

DIMENSION 1

User Experience Orchestration

Streamlined Experience for Every User

A single front door for all employees. Consumer-grade intake via Microsoft Teams, email, and other collaboration tools. AI-powered triage routes every request automatically. Guided buying, smart forms, real-time status tracking. Eliminates intake chaos and ensures compliant data from the very first prompt.

DIMENSION 2

Procurement Orchestration

Synchronized & Automated Workflow Across

A powerful, complete, autonomous S2P engine. The solution orchestrates entire decisions, not just tasks. Autonomous sourcing, agentic contract management, touchless invoice processing. Low-code workflow studio for continuous innovation without IT dependency.

DIMENSION 3

Strategic & Ecosystem Orchestration

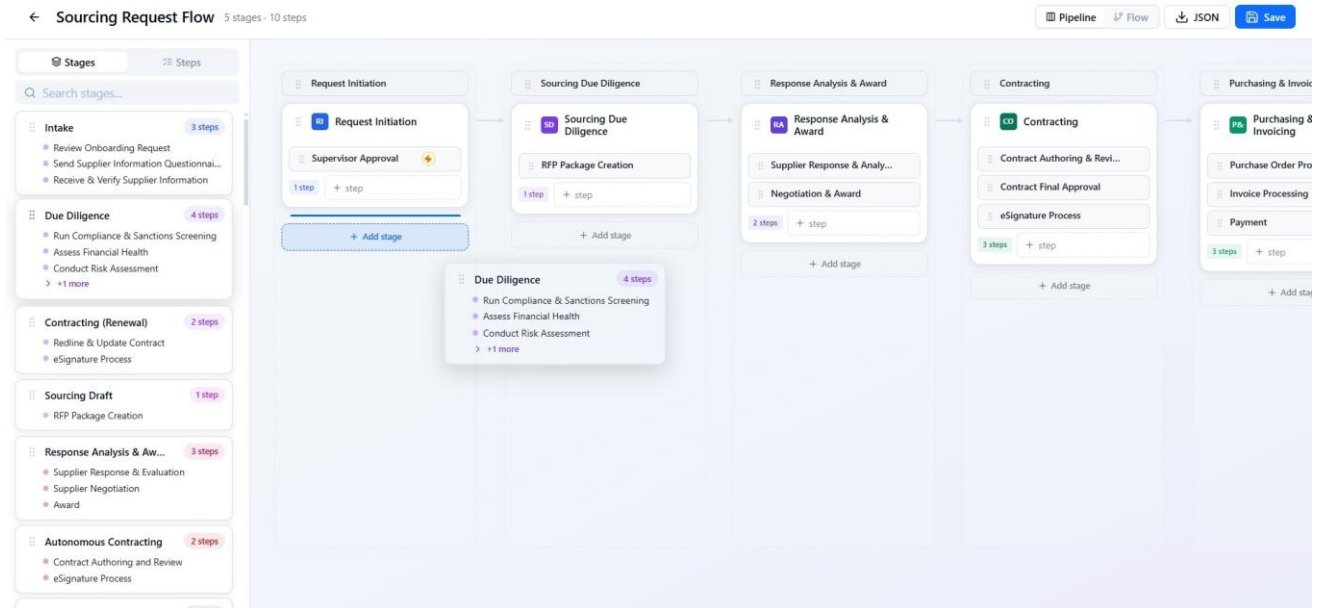

Deep Cross-Domain Integration

GEP's exclusive territory. Extends orchestration from S2P to your entire value chain via the GEP Supply Collaboration Network. Multi-tier supply chain visibility, collaborative demand planning, AI-powered disruption sensing. The only path to true enterprise resilience.

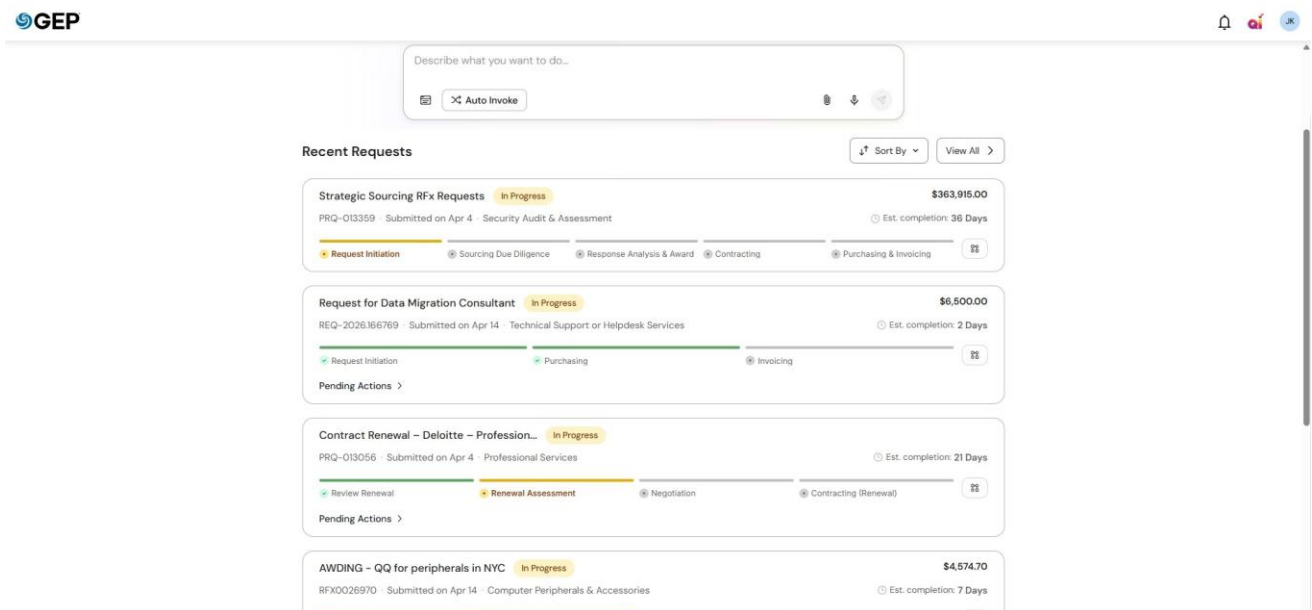

Overview of Core Features & Capabilities

With the following proven, advanced core capabilities, delivered through GEP Quantum Intelligence, Total Agentic Orchestration enables teams to move faster, make better decisions and work without friction.

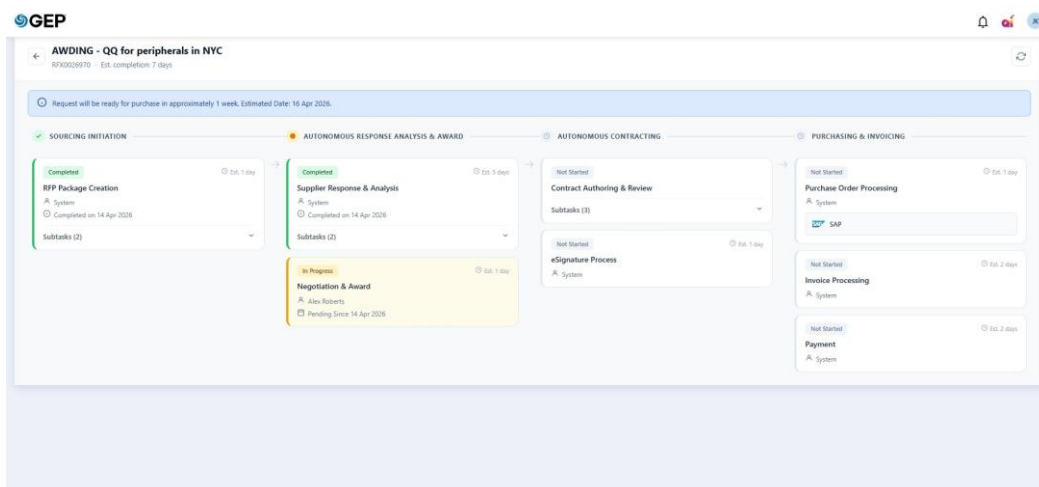

Core Functions	
Unified Intake Management	Configure & Extend Agentic Workflows Autonomous S2P Operations Advanced Data & Decision Intelligence Intelligent Ecosystem Integration
Features	
GEP Quantum Intelligence	The intelligent brain of Total Agentic Orchestration. Drawing on multi-dimensional intelligence built from 25+ years of domain expertise, GEP Quantum Intelligence understands the nuanced language of your business like no generic AI can. It autonomously executes decisions — not just tasks — across sourcing, contracting, purchasing, and supply chain.
Single Intelligent Front Door	One intake engine for all spend requests, meeting users in their natural flow of work — Microsoft Teams, email, and other collaboration tools. Intelligent triage automatically routes every request to the correct downstream process, ensuring compliant data capture from the very first interaction.
Persona-Based Control Towers	Tailors the complete experience to a wide variety of organizational roles, from casual users to strategic procurement professionals. Provides personalized, real-time dashboards with E2E visibility, decision augmentation, and outcome-driven KPI tracking.
Library of 1000+ OOTB Connectors	Seamlessly integrates with any enterprise ecosystem — ERP, CRM, financial systems, and third-party data sources — via a prebuilt connection library. A unified data model eliminates fragmentation without creating new silos, giving you a single source of procurement truth.
Unified Data, Intelligence & Decision Fabric	Provides 360-degree visibility with cross-domain inquiries spanning spend, suppliers, contracts, sourcing, and risk. The solution augments every decision with contextual intelligence, enabling faster, smarter outcomes across all procurement and supply chain functions.
Autonomous Hyper-Automation	The platform goes far beyond isolated AI buttons. Hyper-automation optimizes work and information flows, removes manual steps, and creates touchless operations: automated purchasing transactions, autonomous sourcing events (RFx creation to award), and proactive contract management (administration, amendments, renewals).
Full-Power Low-Code Workflow Studio	Empowers procurement, finance, and legal teams to independently build, deploy, and adapt complex workflows through an intuitive drag-and-drop interface, 5x faster than traditional development, with minimal IT dependency. Unlimited configurations ensure continuous innovation and strategic alignment across your evolving business needs.

Sourcing Request Flow — 5-stage, 10-step intelligent pipeline from intake to payment

Recent Requests dashboard — intelligent intake with real-time status across all active workflows

Agentic workflow detail — autonomous sourcing, contracting & purchasing orchestration with SAP integration

The Path to the Autonomous Enterprise

Total Agentic Orchestration is a journey, not a switch. Organizations progress through three stages, with the solution accelerating each transition and enabling organizations to reach autonomous procurement and supply chain faster than any other solution.

Key Use Cases: From Intake to Autonomous Enterprise

Purchasing New Software	A single request kicks off a unified agentic workflow. GEP Quantum Intelligence engages IT, Legal, and Finance in parallel — cutting approval time from weeks to days with full visibility.
Onboarding a New Contractor	End-to-end automation replaces the slow, manual process. One request simultaneously generates the contract, creates the vendor payment profile, and provisions IT access.
Managing Contract Renewals	Transforms renewals from a reactive problem to a proactive process. The system alerts owners 90 days before expiration, enabling strategic, cost-saving decisions.
Autonomous Agentic Sourcing	The platform autonomously runs entire sourcing events — from RFx creation and supplier discovery to bid analysis and award recommendations — with minimal human intervention.
Supply Chain Disruption Response	GEP Quantum Intelligence continuously monitors global events, senses potential disruptions, runs what-if scenarios, and recommends adaptive strategies to maintain business continuity across your entire supplier ecosystem.
