

# Revolutionise your fleet operations

Discover the Power of Ford Pro™ Telematics

Ford Pro™ Telematics can help you to manage your fleet more efficiently. Offering you a range of productivity tools, alerts and vehicle insights, that let you monitor your vehicles' performance, keep track of where they go, how they're used, and how they're running.

### Improve vehicle usage and security

Keep track of the vehicles in your fleet with GPS tracking, Geo-fencing and vehicle security capabilities. Knowing exactly where all vehicles are at all times increases fleet visibility and helps you improve business productivity.

### Maximise fleet uptime

Set Proactive notifications and vehicle health alerts allowing you to plan ahead and stay ahead. Workflow tools will help you schedule services well in advance, avoid costly, unexpected repairs, and reduce disruption to your operation.

### Optimise your running costs

Monitor the fuel and electric consumption of all your vehicles and not only identify areas of waste, but what the causes are too. This enables you to act on improving efficiency and can help you save money over the life of your vehicles.

### Increase fleet safety

Manage your fleet and driver compliance every day. Set a range of notifications, including advance service reminders, or a warning if a driver isn't wearing their seatbelt. This helps you act quickly, and protect your staff, your vehicles and your operation.

### Transition to electric

The Ford range of hybrid and electric vehicles is developing and growing rapidly. With E-Telematics you can effectively manage your EV fleet. Set vehicle preconditioning, view charge status and remaining EV range, then quickly locate public charging stations and much more.

### Improve driver behaviour

Your drivers play a key role in your operation. Ford Pro™ Telematics provides valuable insights into driver behaviour; informing you of coaching opportunities to increase efficiency, reduce waste, and improve compliance.

Being able to see the health status of the fleet at a glance helps us to reduce vehicle downtime, while driver insights allow us to take action to optimise driving practices

Gateway Housing Association

We really like the Ford Pro™ Telematics Driver app as it allows our drivers to complete daily driver checks and report issues directly to us on the roadworthiness of the vehicle

B & M McHugh Ltd

We chose Ford Pro™ Telematics because we believe it will help us to extend the longevity of our vehicles
